

You may notice we look a little different at the moment...

You might see some of our team wearing special clothes. They might look a bit different and this is OK. Their special clothes help keep germs away so they can stay healthy and treat children safely.

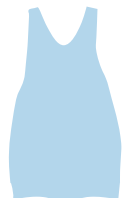

The special clothes are called Personal Protective Equipment (PPE) to keep everyone safe during the COVID-19 pandemic.

Don't be afraid of what you see, our nurses are here to protect you so you can keep having fun, running around and playing with your friends.

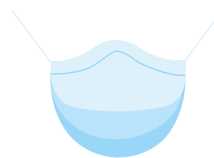

The person looking after you might be wearing:

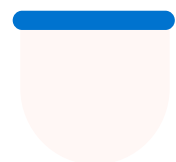

gloves

apron

mask

visor
