

# CASE STUDY

Connor attended Oak Academy Sixth Form to complete his A Levels in ICT, Games Development, Business Studies and History.

After completing his A Levels, Connor decided to apply for the Apprentice position within the Learning and Development Service as he wanted valuable experience of working in a business environment.

During his apprenticeship, Connor had a 3 month schedule which gave him the opportunity to shadow different areas in the Trust and see the variety of job roles available.

Support was provided to Connor by his allocated manager and mentor and he also attended the Apprentice Support Groups; this gave Connor the chance to build relationships with the other Apprentices and discuss any problems with the Apprenticeship Co-ordinator.

Connor enjoyed knowing that his work made a difference to the community and he learnt valuable skills on the job which enabled him to assist the eLearning Lead with managing an eLearning system.

“I wanted to uncover a job that I would enjoy and I have found that role within Dorset HealthCare”

Connor completed his Level 2 Business and Administration apprenticeship and has now gone onto a Level 3 apprenticeship. This has allowed him to take on more responsibilities, such as creating eLearning courses for staff and managing the eLearning inbox.

“I am very pleased to have done an Apprenticeship within Dorset HealthCare as it has opened my eyes to a career in eLearning”

“I have now obtained the skills that I didn't think I had and I can't thank my manager and mentor enough!”
