

CASE STUDY

Before Rachael joined Dorset Healthcare, she had been studying Level 3 Business Studies at college. Rachael enjoyed studying Business Studies and felt that it would be a useful skill to have that she could use in any job role.

During her course, Rachael decided that she did not want to complete her second year in a college setting and felt that she would learn more by doing something practical and gaining experience at the same time.

After searching online, Rachael found and applied for the Quality Apprentice role within the Nursing and Quality directorate at Dorset Healthcare.

In June 2017, Rachael was successful in securing the position and begun working on her Level 3 Business and Administration qualification.

During Rachael's Apprenticeship she was able to gain experience of working within an office environment and learn how to manage her time effectively in order to keep to deadlines. Rachael also enjoyed attending the Apprentice Support Groups which gave her the chance to reflect on her work and learn from the other Apprentices.

“One of the benefits of completing an Apprenticeship is that it eases you into full-time work”

By completing an Apprenticeship with Dorset Healthcare, it has helped Rachael secure a permanent part-time position within her team.

“I would definitely recommend an Apprenticeship at Dorset Healthcare!”

“By undertaking an Apprenticeship, I have increased my skillset and gained lots of new experience which is very important to employers”

“Everyone at Dorset Healthcare has been extremely helpful and patient whilst I'm learning”
