Protect your child against flu

The flu vaccine can protect children against the strains of seasonal influenza. Having the flu vaccine is more important than ever this year with COVID-19 in circulation.

From October 2020 the flu vaccine is available for all children in Dorset from reception to year 7, those home educated and children up the age of 18 in special education schools.

To ensure your child is vaccinated against flu you are required to give consent online. Visit www.dorsethealthcare.nhs.uk/schoolageimms
