

CASE STUDY

Before Tom completed his Apprenticeship, he had joined the Trust as a Porter at Bridport Community Hospital. Since then, Tom has gained lots of experience working within services such as Catering and Domestic, before securing a role as a Healthcare Assistant within the Rehab Service.

Tom decided that he wanted to develop and improve on his current skills and decided that an Apprenticeship was exactly what he was looking for.

With the support of Dorset Healthcare, Tom enrolled onto the Level 2 Healthcare Apprenticeship which he could complete alongside his current role.

During Tom's Apprenticeship, he was able to re-learn different topics, such as Basic Observations, which helped him with his day to day role. He also enjoyed the process of completing an Apprenticeship and praised the maths support from his college tutors.

After completing his Apprenticeship, Tom was awarded a merit for his coursework and has expressed that he now has a better understanding of his role. He also feels more confident about completing a further level of study.

Tom has now signed up to complete a Level 3 Healthcare Apprenticeship and would highly recommend completing an Apprenticeship to anyone!

“Completing an Apprenticeship was good fun and I really enjoyed it!”

“Completing an Apprenticeship is a great way to progress your career without any financial commitment”
