

# CASE STUDY

Before Barny completed his Apprenticeship, he had attended sixth form at The Grange School where he obtained level 3 BTEC qualifications in Sport and Public Services. He had also worked in retail for five years.

Barny knew that he wanted to work in Finance, but as he didn't have any previous experience in this industry he found it difficult to find a job.

After searching on NHS Jobs, Barny found an Apprentice position within the Finance department and decided to apply.

Following an interview, Barny was successful in securing the role within the Finance department at Dorset HealthCare in 2016.

Barny found the apprenticeship very helpful, as he was able to develop his current skills with the support of his colleagues. He was also given his own workload which he used as evidence for his apprenticeship qualification.

"The apprenticeship has given me the experience that I needed!"

Barny finished his Level 2 Business and Administration qualification and is now working as a permanent member of the Finance department.

"Dorset HealthCare is a great place to work where you feel very supported"

"Now that I have gained a permanent role at Dorset HealthCare, I can begin to look at further qualifications to continue my learning"
